### **DETAILED ACTION**

This office action is in response to the Supplemental Appeal Brief received on 10/13/2006. In light of the Applicant's arguments and after conducting a final search, the office finds claims 1-16 allowable over the prior arts of record.

#### ***Allowable Subject Matter***

Claims 1-16 are allowed.

The following is an examiner's statement of reasons for allowance:

Closest prior arts of record, namely Bailey and Matyas, alone or in combination fail to disclose "deriving a first and a second cryptographic key from a user-provided passphrase, using the first cryptographic key to generate an authentication code for a bundle of one or more compressed files, adding the authentication code to the bundle, and encrypting the bundle using the second cryptographic key prior to sending it to a remote server".

Matyas discloses a first cryptographic key (i.e.,  $k_i$ ), used to generate the MAC, and a second cryptographic key (i.e.,  $k_e$ ) to encrypt the contents of the file (col. 9, lines 22-67 and col. 10, lines 1-10). However, Matyas does not expressly disclose wherein  $k_i$  and  $k_e$  are generated using a user provided password or passphrase.

Bailey discloses two levels of encryption. The first level of encryption uses multiple keys based on client-selected string of characters. The second level of encryption is performed by the transmission program, which generates its own internally

generated keys, independent from client-selected string of characters (i.e., Bailey is in fact preventing the user from having any control over the second level of encryption)(col. 18, lines 13-52).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
